Now Hiring: Researcher / Research Analyst

We study sleep and brain aging using genomic, cohort, and medical imaging data. We are looking for a researcher who will grow with us — from research questions and analysis to publications and conference presentations.

Openings	Work style	Growth	Support
TBD	**Remote-first**	**Publications · Independent research**	**Conferences · Training · Computing**

Responsibilities

- Management and epidemiologic/statistical analysis of cohort, clinical, genomic, and medical imaging research data
- Preparation of tables and figures for manuscripts and research reports, and related literature review
- Support for study planning, research data access and management, and project coordination

Qualifications

- Master's degree in a related field (public health, epidemiology, statistics, bioinformatics, biomedical science, etc.) or equivalent research experience
- Independent proficiency in at least one of R or SAS
- Basic knowledge of epidemiology and statistics; ability to read and write English scientific papers
- Ability to manage work independently, document clearly, and collaborate online

Preferred

- Experience with cohort or healthcare big data, and longitudinal or survival analysis
- Experience with GWAS/PRS or quantitative medical image analysis
- Experience writing English scientific papers

What we offer

- **Work style:** Remote-first (online collaboration; regular in-person research meetings and on-site work when needed)
- **Compensation:** Negotiable based on experience, competence, and responsibilities (per institutional regulations)
- Research computing environment and analysis software
- Authorship and independent research opportunities based on research contribution
- Support for domestic and international conference presentations, training, and publication fees

Selection process · Document review → Interview

Application period · Oct 19 – Oct 31, 2026

Required documents · CV, brief statement of motivation, representative analysis/publication experience
